Development: PHP, JavaScript (ES6+), React, HTML5, CSS3, Tailwind CSS, Git

SEO: Technical SEO, On-Page SEO, JSON-LD Schema Markup, Internal Linking, XML Sitemaps, AIO Content Structure

Performance and Hosting: Core Web Vitals (LCP, INP, CLS), Caching, Image Optimisation, Cloudflare, Linux, Nginx, Website Migration, WordPress Security

EXPERIENCE

WordPress Developer & SEO Specialist, Affinco

Jan 2023 - Present

Nagpur, India

- Develop and maintain websites for Affinco and its publishing brands: affinco.com, AFFMaven, AFFNinja, AIMojo and AFFDude.
- Build lightweight custom WordPress plugins and Gutenberg blocks, including Dynamic SEO Dates for auto-updating dates in content.
- Create affiliate UI components: click-to-copy coupon boxes, deal grids, comparison tables and review templates.
- Implement technical SEO: JSON-LD schema, semantic HTML, internal linking, XML sitemaps and content structure for AI answer engines.
- Improve Core Web Vitals through caching, image optimisation, script deferral and Cloudflare configuration.
- Handle ongoing maintenance: core, theme and plugin updates, security hardening, site migrations and troubleshooting.

PROJECTS

Dynamic SEO Dates - WordPress Plugin (PHP, Gutenberg)

Lightweight plugin that inserts auto-updating dates via shortcodes and a Gutenberg block, keeping evergreen articles and search snippets current.

Conference Nights - Web App (React, TypeScript, Supabase)

Directory of conference side events with filtering and detailed event schedules.

iChat - Real-time Chat App (Node.js, Socket.io, JavaScript)

Group chat with live messages and join / leave notifications.

Spotify Clone and AnimeWear E-commerce Site - (HTML, CSS, JavaScript)

Music player with playlist and playback controls; multi-page clothing store with shop, product, cart and blog pages.
